COMPANY SNAPSHOT

“Can you hear me now?” If you are in the MENA region and the answer is yes, you can thank Labib Shalak of MobiNetS for a strong, clear signal. Founded in 2003, MobiNetS enables mobile phone operators to make better informed business decisions by providing them with a dynamic, end-to-end view of their networks. After 40 man-years of research and development, the company’s core software product, Network Enterprise Platform (NEP), was launched in February 2010 and is currently the only comprehensive “next generation operations support system (OSS)” offering on the market. The NEP is a suite of integrated software applications that assist mobile network operators in the design, cost optimization, operation and maintenance of their networks.

Since Labib’s selection as an Endeavor Entrepreneur, he has been recognized as a leading entrepreneur in the mobile and technology space, appearing at the World Mobile Congress and the EY World Entrepreneur of the Year events. In addition, he was named a top 20 entrepreneur in Lebanon in Executive Magazine.
